EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Aasheesh V. Shravah on May 25, 2004

The application has been amended as follows:

In claim 2, line 2, the term "in such a way as to be able" was removed.

In claim 6, line 2, "the fuel" was replaced with "a fuel".

In claim 7, line 2, "the fuel" was replaced with "a fuel".

In claim 8, line 2, "low" was removed, and "that reduces the demineralization load applied to the water purifying equipment" was added after "concentration".

In claim 9, line 2, "low" was removed, and "that reduces the demineralization load applied to the water purifying equipment" was added after "concentration".

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims allowable over the prior art of record, because the prior art is silent to a fuel cell power generating system comprising: a fuel cell unit having a coolant circulations system; a water treatment system for purifying a supply water in a water storage tank and supplying said purified supply water as coolant to said fuel cell unit; in conjunction with a condensed-water

Art Unit: 1746

supply system having a heat exchanger for condensing steam from a hot water storage tank by cooling that steam with auxiliary water to be supplied to said hot water storage tank and recovering said condensed water, and a method of operating the same.

The prior art, such as Murach et al. U.S. Patent 6,171,718, teaches a pressurized water recovery system for a fuel cell comprising: a heat exchanger that condenses water from exhaust, stores said water, and supplies said water to a coolant loop (Fig. 2). The reference is silent to condensing water from the exhaust via heat exchange with auxiliary water supply and purifying said water prior to its delivery to the coolant loop. Therefore, the instant claims are patentably distinct from Murach.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
